# Take a few minutes ...

---

... to add some things to your resume. You can come back to this at the end of the period.

# Now, on to Learning Styles

# Your learning styles are

---

about how you can learn best and be most productive by understanding your preferences and controlling your environment.

This tool will reveal the ways you learn best and how you can be most productive.

The questions take less than 20 minutes. To get the best results:

- Relax, there are no right or wrong answers
- Think carefully about what truly affects how you learn and work
- Don't be influenced by what others may expect of you

Based on accurate answers, your results will help:

- Make studying easier and more effective
- You be more comfortable and effective in class
- Teachers and counselors understand you better

Continue

# Your Results

## Graph showing preferences

- This person's preferences are more toward studying alone, not talking to others, in a well-lighted setting, probably at a desk and with snacks and a drink nearby.

Define category

Your preference

Suggestions

### Alone/Peer

#### Preferred Style | **Independent**

This preference indicates whether you are more productive learning and working with peers, or whether you do better by learning and working alone. This is a very important preference which can affect future success. If you prefer to learn and work with peers, you might be dissatisfied in a job where most of the time is spent working alone. On the other hand, if you prefer learning and working alone, you may be distracted by having peers around most of the time and would be less efficient and productive.

For the Alone/Peer Preference, your score indicates that *you have no strong preference but are leaning towards learning and studying alone*. If you decide that you are more productive learning and working alone, then the following may apply:

- Try to find an area that provides you with the privacy you need, such as the library or a quiet place at home or work.
- While being with others isn't your ideal learning environment, understand that you can learn important things from other people and may be required to do so in school or on the job. You can do your more difficult work when you are alone.
- Learn more about your personality type so that you can better understand your need to be alone while learning, studying and working.

## Alone/Peer

### Preferred Style | Independent

This preference indicates whether you are more productive learning and working with peers, or whether you do better by learning and working alone. This is a very important preference which can affect future success. If you prefer to learn and work with peers, you might be dissatisfied in a job where most of the time is spent working alone. On the other hand, if you prefer learning and working alone, you may be distracted by having peers around most of the time and would be less efficient and productive.

For the Alone/Peer Preference, your score indicates that *you have no strong preference but are leaning towards learning and studying alone*. If you decide that you are more productive learning and working alone, then the following may apply:

- Try to find an area that provides you with the privacy you need, such as the library or a quiet place at home or work.
- While being with others isn't your ideal learning environment, understand that you can learn important things from other people and may be required to do so in school or on the job. You can do your more difficult work when you are alone.
- Learn more about your personality type so that you can better understand your need to be alone while learning, studying and working.

## Auditory

### Preferred Style | Low Auditory

Some people like to learn by listening and talking. Others find listening and talking distracting to their learning.

For the Auditory Preference, your score indicates that *you have no strong preference but are leaning towards not being an auditory learner*. If you decide you do not like to learn by listening, then the following may apply:

- As an aid in listening, read the material before class and take comprehensive notes.
- Ask if you can have written directions or instructions when none are provided.
- There are often situations when you must use and remember what you have heard. Practice using memory devices to remember what you hear.
- Since auditory learning is not your preferred mode, use visual, kinesthetic and tactile strategies to remember what you are studying.

## Design

### Preferred Style | Traditional Setting

Extensive studies over the last 30 years have shown that the physical design of the furniture in your learning and studying environment has a direct effect on achievement. The traditional straight-backed chairs and formal desk environment do not always work for some people who prefer a less formal design.

For the Design Preference, your score indicates that *you have no strong preference but are leaning towards having a more formal design in your learning environment*. If you decide that having a more formal design in your environment is more acceptable to you, then the following may apply:

- Try to study while sitting in a straight-backed chair at a table or desk with a laptop or desktop computer and study resources nearby.
- Avoid sitting on a couch, soft cushions, or in bed while you are trying to study and learn.
- If your learning environment only has soft seating, try sitting on the floor with your back up against a wall.
